PROFESSIONAL SUMMARY

Full Stack Web Developer experienced in building scalable web applications, dashboards, and real-time systems using React, Node.js, Firebase, and REST APIs. Delivered 5+ production-ready systems for clients and business use, improving workflow efficiency and user engagement. Skilled in frontend, backend, API integration, authentication, and cloud deployment.

PROFESSIONAL EXPERIENCE

Digiscribe Transcription Corp.

Feb 2026 – May 2026

Full Stack Web Developer Intern

- Built real-time transcription management system (React, Firebase, Express), reducing manual file handling by ~40%
- Developed Vicmar Homes real estate system managing 30+ property listings, improving visibility and inquiries
- Implemented role-based dashboards and file explorer, supporting 10+ users and improving workflow efficiency
- Architected and deployed split hosting (frontend: Supreme Host Center, backend: Vercel), improving scalability and reliability

Slimeatory

Jan 2026 – Jun 2026

E-Commerce Web Developer / Shopify SEO Specialist Part-Time

- Developed and customized Shopify theme sections, templates, navigation menus, and page layouts using Liquid, JSON, HTML, CSS, and JavaScript
- Optimized product and page SEO, including SEO titles, meta descriptions, product descriptions, tags, and backend content for better search visibility
- Improved Shopify storefront usability by fixing layout issues, dropdown menus, headers, product pricing display, and responsive design problems
- Coordinated with team members on product images, newsletter assets, content updates, and Shopify development tasks through Slack and Trello
- Audited store structure, product listings, out-of-stock products, and navigation flow to support better user experience and SEO performance

Freelance

Jan 2023 – Apr 2026

Full-Stack Web Developer

- Delivered 5+ full-stack systems (booking, ordering, business platforms) used by real users and clients
- Built responsive UI and real-time features, improving usability and engagement
- Developed backend systems with authentication, CRUD operations, and REST API integration using Node.js and Firebase
- Deployed applications via Vercel and GitHub, ensuring fast and reliable delivery

EDUCATION

Bachelor of Science in Information Technology

Aug 2023 – Jul 2026

University of Batangas

Bachelor of Science in Information Technology

Aug 2022 – Jun 2023

Lyceum of the Philippines University – Batangas

Bachelor of Science in Electrical Engineering

Aug 2021 – Jun 2022

Batangas State University – Alangilan

SKILLS

- **Languages:** JavaScript, TypeScript, PHP, Python, Java, C++, React Native, Flutter
- **Frontend:** HTML, CSS, React, Next.js, Tailwind CSS, Bootstrap, Vite.js, Liquid

- **Backend:** Node.js, Express, Laravel, RESTful APIs
- **Databases:** PostgreSQL, MySQL, Supabase
- **Tools:** Git, Vercel, Figma, AWS, Google Cloud, Firebase, Trello

PROJECTS

LALA LOO Shopify E-commerce Website

- Built and customized a responsive Shopify storefront using Liquid, JSON, HTML, CSS, JavaScript, and the Shapes theme, covering product, subscription, trade/wholesale, festival, venue, and content pages
- Extended the theme with customizable sections and interactive components, including carousel experiences while preserving native Shopify functionality and theme-editor flexibility
- Improved cross-device consistency through Figma-based implementation, responsive optimization, and QA, refining layouts, typography, imagery, buttons, links, and mobile behavior

Gloopii Shopify Store & POS Add-ons

- Built the Shopify storefront from scratch using Liquid, custom sections/snippets, CSS, and JavaScript, creating branded product, collection, booking, contact, franchise, and content experiences
- Developed metafield-powered product add-ons and a Shopify POS extension for configurable extras, supporting both online product customization and in-store purchases
- Expanded store functionality through BookThatApp integration, responsive navigation, product setup, SEO, domain configuration, and mobile QA, while keeping content manageable through Shopify

Slimeatory Shopify E-commerce Website

- Customized and developed the Shopify storefront using Liquid sections, Shopify schema settings, responsive CSS, and JavaScript, while retaining native Shopify product, cart, customer, and checkout functionality
- Built an interactive DIY Slime Builder with configurable texture, color, scent, and add-ons, including real Shopify product/variant assignment, a sticky preview, and animated interactions
- Improved the shopping and booking experience through BookThatApp integration, responsive fixes, navigation improvements, custom layouts, product presentation, SEO, and cross-device QA

Digiscribe Transcription Dashboard System

- Centralized transcription workflow by building a real-time FTP sync dashboard (React, Firebase, Express), reducing manual file tracking issues
- Improved team productivity by implementing role-based dashboards, enabling efficient task management for transcriptionists and admins
- Streamlined file access through a custom file explorer system, improving organization and retrieval speed

Vicmar Homes Real Estate Management System

- Increased property visibility by managing 30+ listings with real-time availability tracking
- Optimized property management by building an admin dashboard, reducing manual listing updates
- Increased customer engagement by integrating chat and inquiry features, improving communication efficiency

UB FoodHub Canteen Ordering System

- Reduced ordering time by ~30% by digitizing the menu and checkout process
- Processed multiple orders daily through a real-time ordering system
- Improved engagement with live order tracking and updates

RK Barbershop Booking System

- Reduced scheduling conflicts by ~35% through a real-time booking system
- Handled daily appointment bookings with automated notifications
- Simplified operations using the admin dashboard

DecoBlu USA Business Website

- Strengthened brand presence by developing a modern business website, improving visual presentation, and credibility

- Improved accessibility by implementing a responsive design, ensuring usability across devices
